CONTENTS OF VOLUME 16

Special Invited Papers, Wald Lectures, Articles and Short Communications

AKRITAS, MICHAEL G. Rank tests with interval-censored data .. 1490–1502

AMARI, SHUN-ICHI AND KUMON, MASAYUKI. Estimation in the presence of infinitely many nuisance parameters—geometry of estimating functions 1044–1068

AMEMIYA, YASUO AND ANDERSON, T. W. The asymptotic normal distribution of estimators in factor analysis under general conditions 759–771

AMEMIYA, YASUO AND FULLER, WAYNE A. Estimation for the nonlinear functional relationship 147–160

ANDERSON, T. W. AND AMEMIYA, YASUO. The asymptotic normal distribution of estimators in factor analysis under general conditions 759–771

ARJAS, E. AND HAARA, P. A note on the asymptotic normality in the Cox regression model 1133–1140

ASSAF, DAVID. A dynamic sampling approach for detecting a change in distribution 236–253

BAI, CHONGEN AND OLSHEN, RICHARD A. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall . 953–956

BARNDORFF-NIELSEN, O. E. AND BLÆSILD, P. Combination of reproductive models 323–341

BARNDORFF-NIELSEN, O. E. AND JUPP, P. E. Differential geometry, profile likelihood, *L*-sufficiency and composite transformation models 1009–1043

BEDER, JAY H. A sieve estimator for the covariance of a Gaussian process 648–660

BERAN, RUDOLF. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 956–959

BICKEL, PETER J. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 959–961

BLÆSILD, P. AND BARNDORFF-NIELSEN, O. E. Combination of reproductive models 323–341

BOSE, ARUP. Edgeworth correction by bootstrap in autoregressions 1709–1722

BRILLINGER, DAVID R. The 1983 Wald Memorial Lectures: Some statistical methods for random process data from seismology and neurophysiology 1–54

BROWN, LAWRENCE D. Admissibility in discrete and continuous invariant nonparametric estimation problems and in their multinomial analogs 1567–1593

BUCKLAND, STEPHEN T., GARTHWAITE, PAUL H. AND LOVELL, HOWARD G. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 962–965

CAPÉRAÀ, PHILIPPE. Tail ordering and asymptotic efficiency of rank tests 470–478
CARLSTEIN, E. Nonparametric change-point estimation 188–197
CHAKRAVARTI, I. M. AND MORGAN, JOHN P. Block designs for first and second order neighbor correlations 1206–1224
CHAN, N. H. AND WEI, C. Z. Limiting distributions of least squares estimates of unstable autoregressive processes 367–401
CHAO, MIN-TE AND LO, SHAW-HWA. Some representations of the nonparametric maximum likelihood estimators with truncated data 661–668
CHEN, HUNG. Convergence rates for parametric components in a partly linear model 136–146
CHEN, HUNG. Lower rate of convergence for locating a maximum of a function 1330–1334
CHENG, CHING-SHUI AND COSTER, DANIEL C. Minimum cost trend-free run orders of fractional factorial designs 1188–1205
CHIU, SHEAN-TSONG. Weighted least squares estimators on the frequency domain for the parameters of a time series 1315–1326
CLAYTON, MURRAY K. AND WITMER, JEFFREY A. Two-stage bandits 887–894
CLINE, DAREN B. H. Admissible kernel estimators of a multivariate density 1421–1427
COSTER, DANIEL C. AND CHENG, CHING-SHUI. Minimum cost trend-free run orders of fractional factorial designs 1188–1205
COX, DENNIS D. Approximation of least squares regression on nested subspaces 713–732
COX, DENNIS D. Approximation of method of regularization estimators 694–712
COX, DENNIS. KOH, EUNMEE, WAHBA, GRACE AND YANDELL, BRIAN S. Testing the (parametric) null model hypothesis in (semiparametric) partial and generalized spline models 113–119
CUZICK, JACK. Rank regression 1369–1389
DABROWSKA, DOROTA M. Kaplan–Meier estimate on the plane . 1475–1489
DAHLHAUS, RAINER. Small sample effects in time series analysis: A new asymptotic theory and a new estimate 808–841
DE TURCKHEIM, E. AND PONS, O. Cox's periodic regression model 678–693
DEVROYE, LUC. Asymptotic performance bounds for the kernel estimate 1162–1179
DICICCIO, THOMAS J. AND ROMANO, JOSEPH P. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 965–969
DONOHO, DAVID L. One-sided inference about functionals of a density 1390–1420
DONOHO, DAVID L. AND LIU, RICHARD C. Pathologies of some minimum distance estimators 587–608

DONOHO, DAVID L. AND LIU, RICHARD C. The "automatic" robustness of minimum distance functionals 552–586
DUPAČOVÁ, JITKA AND WETS, ROGER. Asymptotic behavior of statistical estimators and of optimal solutions of stochastic optimization problems 1517–1549
EDELMAN, DAVID. Estimation of the mixing distribution for a normal mean with applications to the compound decision problem 1609–1622
EFRON, B. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 969–972
EICK, STEPHEN G. The two-armed bandit with delayed responses 254–264
EPPS, T. W. Testing that a Gaussian process is stationary 1667–1683
FABIAN, VÁCLAV. Polynomial estimation of regression functions with the supremum norm error 1345–1368
FRIEDMAN, YAAKOV, GELMAN, ALEXANDER AND PHADIA, ESWAR. Best invariant estimation of a distribution function under the Kolmogorov-Smirnov loss function 1254–1261
FULLER, WAYNE A. AND AMEMIYA, YASUO. Estimation for the nonlinear functional relationship 147–160
GAJEK, LESŁAW. On the minimax value in the scale model with truncated data 669–677
GARTHWAITE, PAUL H., LOVELL, HOWARD G. AND BUCKLAND, STEPHEN T. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 962–965
GASSER, THEO AND KNEIP, ALOIS. Convergence and consistency results for self-modeling nonlinear regression 82–112
GELMAN, ALEXANDER, PHADIA, ESWAR AND FRIEDMAN, YAAKOV. Best invariant estimation of a distribution function under the Kolmogorov-Smirnov loss function 1254–1261
GHOSH, MALAY AND YANG, MING-CHUNG. Simultaneous estimation of Poisson means under entropy loss 278–291
GILL, RICHARD D., VARDI, YEHUDA AND WELLNER, JON A. Large sample theory of empirical distributions in biased sampling models 1069–1112
GRAY, ROBERT J. A class of k-sample tests for comparing the cumulative incidence of a competing risk 1141–1154
GRÜBEL, R. The length of the shorth 619–628
GUTTORP, PETER AND KO, DAIJIN. Robustness of estimators for directional data 609–618
GUTTORP, PETER AND LOCKHART, RICHARD A. On the asymptotic distribution of quadratic forms in uniform order statistics 433–449
HAARA, P. AND ARJAS, E. A note on the asymptotic normality in the Cox regression model 1133–1140
HALL, PETER. Rejoinder 981–985

HALL, PETER. Theoretical comparison of bootstrap confidence intervals 927–953
HALL, PETER AND MARRON, J. S. Choice of kernel order in density estimation 161–173
HALLIN, MARC AND PURI, MADAN L. Optimal rank-based procedures for time series analysis: Testing an ARMA model against other ARMA models 402–432
HANNAN, E. J. AND POSKITT, D. S. Unit canonical correlations between future and past 784–790
HÄRDLE, W., JANSSEN, P. AND SERFLING, R. Strong uniform consistency rates for estimators of conditional functionals 1428–1449
HÄRDLE, W. AND TSYBAKOV, A. B. Robust nonparametric regression with simultaneous scale curve estimation 120–135
HART, JEFFREY D. An ARMA type probability density estimator 842–855
HAUGHTON, DOMINIQUE M. A. On the choice of a model to fit data from an exponential family 342–355
HENZE, NORBERT. A multivariate two-sample test based on the number of nearest neighbor type coincidences 772–783
HOOPER, PETER M. Simultaneous estimation and prediction using the expected coverage measure criterion 265–277
HORN, PAUL S. On the stochastic ordering of absolute univariate Gaussian random variables 1327–1329
HU, INCHI. Repeated significance tests for exponential families .. 1643–1666
JANSSEN, P., SERFLING, R. AND HÄRDLE, W. Strong uniform consistency rates for estimators of conditional functionals 1428–1449
JEGANATHAN, P. On the strong approximation of the distributions of estimators in linear stochastic models, I and II: Stationary and explosive AR models 1283–1314
JENSEN, SØREN TOLVER. Covariance hypotheses which are linear in both the covariance and the inverse covariance 302–322
JOE, HARRY. Majorization, entropy and paired comparisons 915–925
JUPP, P. E. AND BARNDORFF-NIELSEN, O. E. Differential geometry, profile likelihood, L-sufficiency and composite transformation models 1009–1043
KARUNAMUNI, ROHANA J. On empirical Bayes testing with sequential components 1270–1282
KEMPTHORNE, PETER J. Controlling risks under different loss functions: The compromise decision problem 1594–1608
KHMALADZE, E. V. An innovation approach to goodness-of-fit tests in R^m 1503–1516
KNEIP, ALOIS AND GASSER, THEO. Convergence and consistency results for self-modeling nonlinear regression 82–112
KO, DAIJIN AND GUTTORP, PETER. Robustness of estimators for directional data 609–618

KOH, EUNMEE, WAHBA, GRACE, YANDELL, BRIAN S. AND COX, DENNIS. Testing the (parametric) null model hypothesis in (semiparametric) partial and generalized spline models 113–119
KUMON, MASAYUKI AND AMARI, SHUN-ICHI. Estimation in the presence of infinitely many nuisance parameters—geometry of estimating functions 1044–1068
LAI, TZE LEUNG. Nearly optimal sequential tests of composite hypotheses 856–886
LE CAM, LUCIEN AND YANG, GRACE L. On the preservation of local asymptotic normality under information loss 483–520
LEE, CHU-IN CHARLES. Quadratic loss of order restricted estimators for treatment means with a control 751–758
LEHMANN, ERICH L. Comparing location experiments 521–533
LI, L. A. AND SEDRANSK, N. Mixtures of distributions: A topological approach 1623–1634
LIANG, TACHEN. On the convergence rates of empirical Bayes rules for two-action problems: Discrete case 1635–1642
LIM, YONG B. AND STUDDEN, W. J. Efficient D_s-optimal designs for multivariate polynomial regression on the q-cube 1225–1240
LIU, REGINA Y. Bootstrap procedures under some non-i.i.d. models 1696–1708
LIU, REGINA Y. AND SINGH, KESAR. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 978–979
LIU, RICHARD C. AND DONOHO, DAVID L. Pathologies of some minimum distance estimators 587–608
LIU, RICHARD C. AND DONOHO, DAVID L. The "automatic" robustness of minimum distance functionals 552–586
LO, ALBERT Y. A Bayesian bootstrap for a finite population 1684–1695
LO, SHAW-HWA AND CHAO, MIN-TE. Some representations of the nonparametric maximum likelihood estimators with truncated data 661–668
LOCKHART, RICHARD A. AND GUTTORP, PETER. On the asymptotic distribution of quadratic forms in uniform order statistics 433–449
LOH, WEI-YIN. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 972–976
LOVELL, HOWARD G., BUCKLAND, STEPHEN T. AND GARTHWAITE, PAUL H. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall 962–965
MAJOR, P. AND REJTŐ, L. Strong embedding of the estimator of the distribution function under random censorship 1113–1132
MARRON, J. S. AND HALL, PETER. Choice of kernel order in density estimation 161–173
MATHEW, THOMAS AND SINHA, BIMAL KUMAR. Optimum tests in unbalanced two-way models without interaction 1727–1740

1749

McLeish, D. L. and Small, Christopher G. Generalizations of ancillarity, completeness and sufficiency in an inference function space 534–551
Mintz, Max and Zeytinoglu, Mehmet. Robust fixed size confidence procedures for a restricted parameter space 1241–1253
Morgan, John P. and Chakravarti, I. M. Block designs for first and second order neighbor correlations 1206–1224
Mukerjee, Hari. Monotone nonparametric regression 741–750
Nabeya, Seiji and Tanaka, Katsuto. Asymptotic theory of a test for the constancy of regression coefficients against the random walk alternative 218–235
Neill, James W. Testing for lack of fit in nonlinear regression . . 733–740
Neuhaus, Georg. Addendum to: "Local asymptotics for linear rank statistics with estimated score functions" 1342–1343
Nogami, Yoshiko. Convergence rates for empirical Bayes estimation in the uniform $U(0, \theta)$ distribution 1335–1341
Olshen, Richard A. and Bai, Chongen. Discussion of "Theoretical comparison of bootstrap confidence intervals" by Hall . 953–956
Oman, Samuel D. Confidence regions in multivariate calibration 174–187
Phadia, Eswar, Friedman, Yaakov and Gelman, Alexander. Best invariant estimation of a distribution function under the Kolmogorov-Smirnov loss function 1254–1261
Pons, O. and de Turckheim, E. Cox's periodic regression model 678–693
Portnoy, Stephen. Asymptotic behavior of likelihood methods for exponential families when the number of parameters tends to infinity 356–366
